

AggreBind™

**SOCIAL
UPLIFTMENT PROJECTS**

The 'marketplace' is an all encompassing experience. It is a place to sell your wares, from produce & fish to electronics & dry goods. It is a place where mothers care for and raise their babies and children. It is a place where the older children help care for their younger brothers & sisters. It is a place of social and civic contribution and responsibility. It is the place where everyone comes together.

Vendors have typically sold their produce and wares along the dusty side roads and streets.

With vision, social conscience, 20,000 m² of area and some imagination... A Marketplace starts coming together

Main road approximately 0.5 Km with raised marketplace stalls

Indicative of all aisles

To be the Main Square

Marketplace from concept to reality

Literally raising people up from the dirt and dust

Affects all aspects of life, including family

Through a combination of heart & head, ideals and industry, life can be transformed

Caring & safe

 **AggreBind™**

Changing for the family, changing for the better

One of the many examples of market life

After

Before

To make the world a better place....

How can we teach children, in conditions like these, to secure a better future for themselves and our planet

There are many thousands of communities trying to survive in impossible living conditions on contaminated land' with no water or other basic requirements.

These are the homes for many of the children on planet earth.

Many roads are virtually impassable further isolating these communities.

 **AggreBind™**

have developed solutions to try and provide a better future, for the planet, and all its people.

On an Island, far away.....

Sustainable Community Development

Community development is the process of increasing:

- * the strength and effectiveness of communities
- * improving peoples' quality of life
- * enabling people to participate in decision making to achieve greater long-term control over their lives.

Sustainable community development programs are those that contribute to the long-term strengthening of community viability.

Action:

- * Foster constructive working relationships and alliances among communities, companies and governments.
- * Build capacity within governments, companies, and communities to address sustainable development issues at the local level.
- * Promote the value-adding potential of economically viable development.
- * Create new opportunities for the local and regional communities.

Operational Guidelines:

- 1 Implement and maintain ethical business practices.
- 2 Integrate sustainable development considerations within the decision-making process.
- 3 Uphold fundamental human rights and respect cultures, customs, and values.
- 4 Implement risk management strategies based on valid data and sound science.
- 5 Seek continual improvement for the health and sustainability of communities..
- 6 Seek continual improvement for the protection of the environment..
- 7 Contribute to conservation of biodiversity and integrated approaches to land use planning.
- 8 Facilitate and encourage responsible product design, use, re-use, and recycling, of all available materials.
- 9 Contribute to the social, economic, and institutional development of communities.
- 10 Implement effective and transparent engagement, communication and independently verified reporting arrangements with communities.

Development analysis:

When reviewing programs for community development the following must be considered:

- Has the community discussed a development plan?
- Is the development sustainable?
- What are the community's main priorities, objectives and support for change?
- What natural resources and skills are available in the immediate area?
- How will the project be financed and who will control the finance?
- Does the community have a road and services infrastructure?
- Does the community have schools, clinics etc

The main objective is sustainability that provides a long term future for the community.
